

**NATURAL
WATER CONDITIONER**

A proprietary environmentally friendly formula of selected natural bacteria, enzymes, and nutrients on a biodegradable water soluble base.

- Improves overall water quality and clarity
- Aids in ammonia, nitrite and carbon dioxide reduction
- Digests floating and suspended organic matter
- Accelerates bottom sludge reduction — can reduce sludge by 70%
- Consumes excess nutrients in water column and pond bottom sediments
- Controls noxious pond odors caused by hydrogen sulfide and methane gas
- Restores pond's natural aquatic eco-system
- Chemical free formula
- Safe for humans, animals, fish and plants
- Not an algacide

Application and Use Procedures

Apply directly to Pond Water

Size of Pond	First Week Dosage	Maintenance Dosage
Up to 30,000 gallons	1 Tablespoon every other day	2 teaspoons per week

*30,000 gal & up – Dose proportionally

Saltwater requires 2-3 times dosage rate of freshwater environments.

Conditions for best results:

Water temperature: min. 50 degrees F
pH 7.0 to 8.0 min. 5.0 – max 9.5
Proper aeration improves results.

Caution:

Results may vary due to pond conditions

NOTE: Aqua-C is not a chemical. It may take several weeks to see water quality improvements. Continue the application program for best results.

Keep out of reach of children
Store in a cool dry location. Do not freeze.
